EDUCATION

B.E. Computer Science & Engineering
Nepal Engineering College, Bhaktapur
2012–2016

+2 Science
Goldengate International College
2010–2012

SLC
Manakamana Higher Secondary School
1997–2010

SKILLS

LANGUAGES
Python, C#, JavaScript, SQL, TypeScript, Bash

TEST AUTOMATION
Playwright, Selenium, Cypress, Robot Framework, Appium, JMeter, Postman

SCRAPING & DATA
curl_cffi, Patchright, BeautifulSoup, Async Pipelines

CI/CD & INFRA
Jenkins, GitHub Actions, Terraform, Docker, Linux

DATABASES
MongoDB, SQLite, MSSQL

AI TOOLS
Claude, AI-Assisted Dev

ENGLISH PROFICIENCY

PTE Academic: Overall 89
Listening 84 • Reading 81
Speaking 75 • Writing 88

ACHIEVEMENTS

Qualithon 2022 Winner
Ranked #1 among 200 participants

Cotiviti Hackafest Winner
Cut test runtime 60% via Selenoid

Applitools Cross-Browser (Gold)
50+ browser compatibility tests

Applitools Visual AI (Silver)
AI-powered visual testing solutions

PUJAN ARYAL

Senior SDET | Software Engineer - QA Automation

Results-driven QA Automation Engineer with 8+ years of experience building scalable test frameworks and data pipelines across Healthcare, Cybersecurity, and Bidding domains. Currently architecting E2E test automation and large-scale healthcare data extraction systems at an AI-first company using Playwright, Python, and Claude. Proven track record of increasing test coverage by 70%, reducing execution time by 50%, and building 170+ production scrapers.

EXPERIENCE

Software Engineer - QA Automation III
12/2025–Present
Audio Bee Technologies, Inc. • Remote

- Built and maintained automated testing infrastructure, strengthening test coverage, and safeguarding the quality and stability of products across release cycles for dataweav product.
- Developed internal QA tools that empower QA engineers to monitor and ensure data quality effectively.
- Leveraged AI-first development workflow with AI tools for code generation, debugging, and review, increasing engineering velocity.
- Conducted security-focused testing, including penetration testing and identifying potential vulnerabilities in software systems.

Senior QA Engineer (Automation)
04/2022–11/2025
Logpoint • Kathmandu

- Enhanced test coverage by 70% across UI (Web/Desktop), API, Backend, and Database layers using Cypress, Selenium, Python, Robot Framework, and Bash. Decreased test execution time by 50% through parallel execution and API-driven test setups, accelerating CI feedback loops.
- Designed 300+ test cases, identified 100+ defects, and managed Jenkins CI/CD pipelines for nightly regression execution.
- Automated machine provisioning, patching, and ISO setup using Terraform, Govc, PowerShell, and Bash, eliminating manual intervention.
- Mentored and trained 5+ QA engineers, improving team productivity and adherence to automation best practices.

Senior Software Engineer (QA Automation)
05/2021–04/2022
Teksewa • Kathmandu

- Built web and mobile test automation framework from scratch using Selenium, Appium, and C#, enhancing test coverage by 40%.
- Led a team of 3 QA Engineers, mentoring on manual and automation best practices, streamlining testing processes.
- Conducted performance and load testing with JMeter, identifying system bottlenecks and optimizing product performance by 20%. Managed Jenkins CI pipelines for nightly execution.

Software Engineer (QA Automation)
11/2018–04/2021
Cotiviti • Kathmandu

- Developed 200+ automation tests using Selenium and C#, improving test coverage by 30% and reducing execution time by 40% through parallelization.
- Optimized automation framework and test suites, reducing flakiness and false positives/negatives by 20%. Managed Bamboo CI plans for nightly execution.
- Created in-house automation dashboard using Ember and Node, improving visibility into test execution status across teams.

Computer Operator
02/2017–12/2017
Federal Parliament Secretariat • Kathmandu, Nepal

- Performed high-volume data entry and digitized official government records with strict accuracy and confidentiality.
- Provided desktop, hardware, and office software support, keeping daily administrative workflows running smoothly.
